

Landscaping Update

With our new landscape company starting last week, 9/17/19, and after receiving a few compliments, complaints & concerns, a few members of your BOD's met with the supervisors responsible for our community. We discussed the outstanding issues and were assured they would take the appropriate steps to correct each one. A few things the landscapers mentioned that would help improve service was the access to backyards, they've found locked gates, gates wrapped with wire and gates with inoperable latches and/or hinges. Please check and have any necessary repairs done to your gates! Another question they raised was the RED & BLUE reflectors. We checked with a few residents with reflectors and understood the **RED REFLECTOR** meant "Do Not Cut, I Do My Own Landscaping" & the **BLUE REFLECTOR** meant "Do Not Use Chemicals for Weeding". Also, many yards need increased watering. We encourage everyone to check your time clocks, sprinkler heads & zones to be sure they are functioning properly.

Lastly, on Monday September 30th, Precision Landscaping will be implementing a "Door Hanger Notice Program" (see attached picture). This is how they will communicate with residents any issues they encounter.
